### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Specification*

The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6, 9, 11, 19, 22 are rejected under 35 U.S.C. 102(b) as being anticipated by Chuan-Jen. The patent to Chuan-Jen teaches structure as claimed including a pallet comprising a deck, a plurality of legs extending downwardly from the deck, the deck having raised and recessed areas (fig. 5), the raised areas lying in a substantially horizontal top plane, the recessed areas being vertically spaced from the raised areas and lying in a substantially horizontal bottom plane, and an upstanding wall interconnecting the raised and recessed areas, the raised and recessed areas are arranged on the deck in an alternating pattern relative to each other, a trench (middle section) formed centrally within and substantially spanning the deck, the trench having a base that lies in the bottom plane, the raised and recessed areas being formed on both sides of the trench, a support column extending upwardly from the base of the trench and being located adjacent the recessed area located adjacent to the trench, a spacer

extending upward from the base of the trench and having a top surface lying in the top plane, outer wall and peripheral rim.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 7, 8, 10, 12-18, 20, 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chuan-Jen in view of Brown et al. The patent to Chuan-Jen teaches structure substantially as claimed as discussed above including trench, deck, the only difference being the use of folds, holds and drainage structure. However, the patent to Brown et al teaches the use of holds, ribs, and drainage structure (figs. 1, 2, 5, 6) to be old. It would have been obvious and well within the level of ordinary skill in the art at the time of the invention was made to modify the structure of Chuan-Jen to include holds, ribs, and drainage structure, as taught by Brown et al since such structures are

Art Unit: 3637

conventional alternative structures used in the same intended purpose, thereby providing structure as claimed.

### **Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patents to Yellin, Bell, Munk et al, Bell, Bendit et al, Carson et al teach structure similar to applicant's.
